

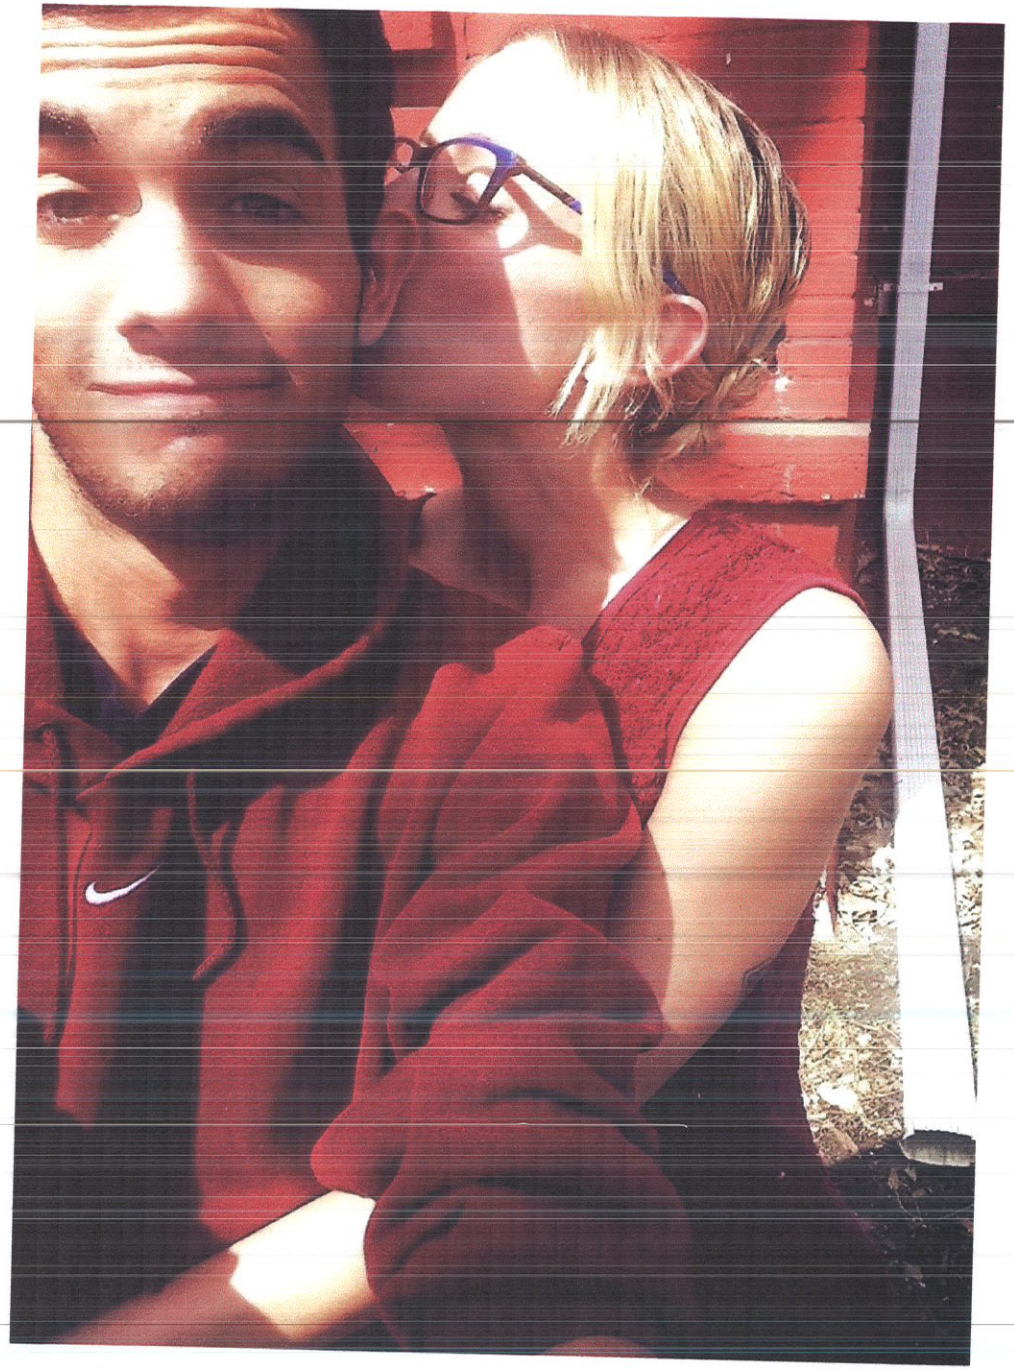
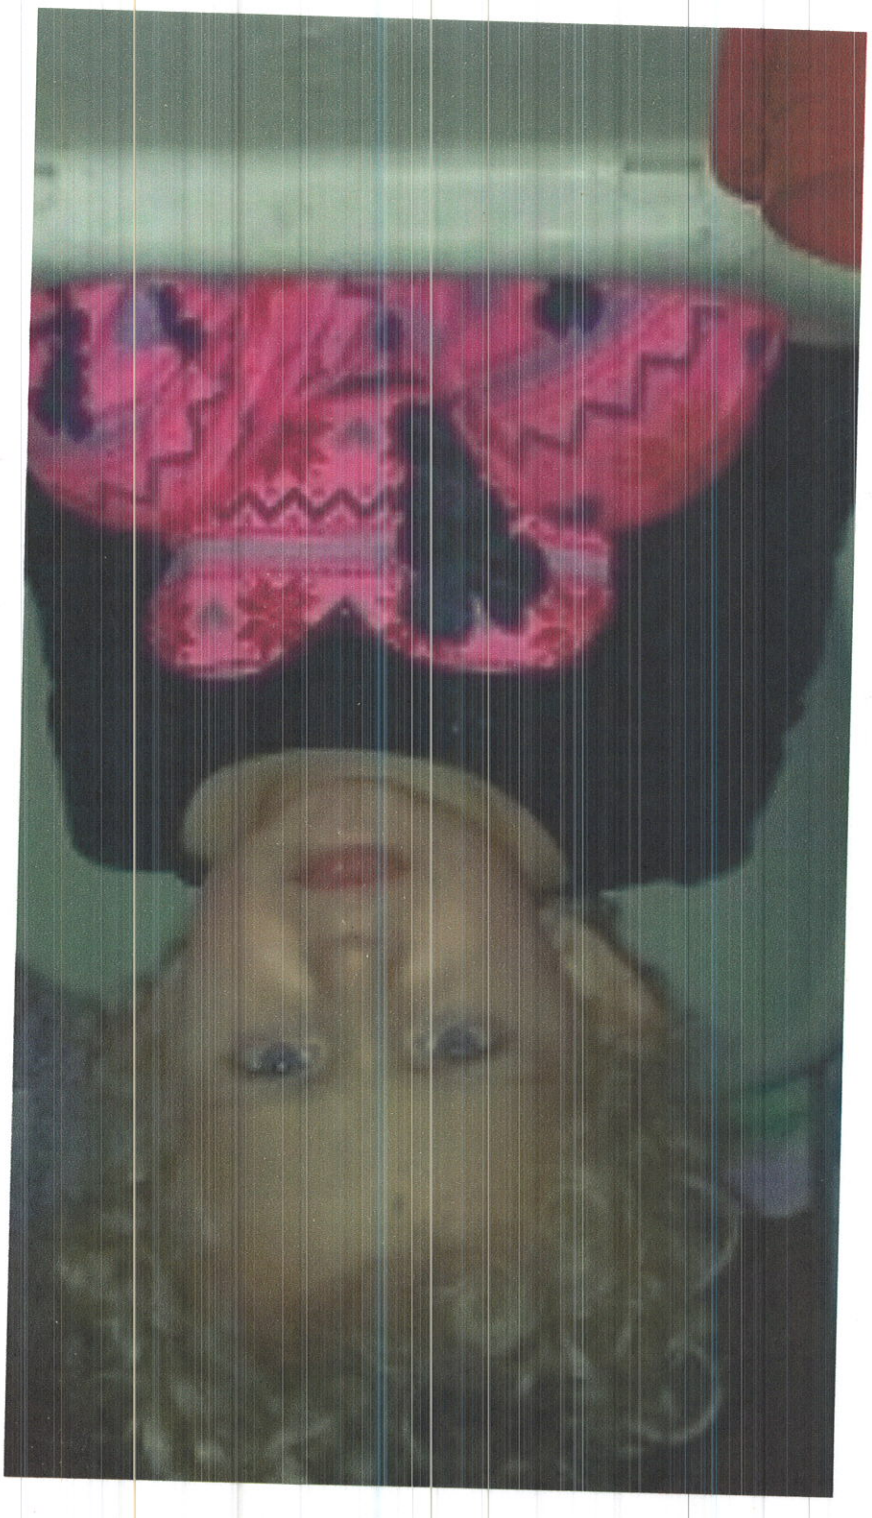
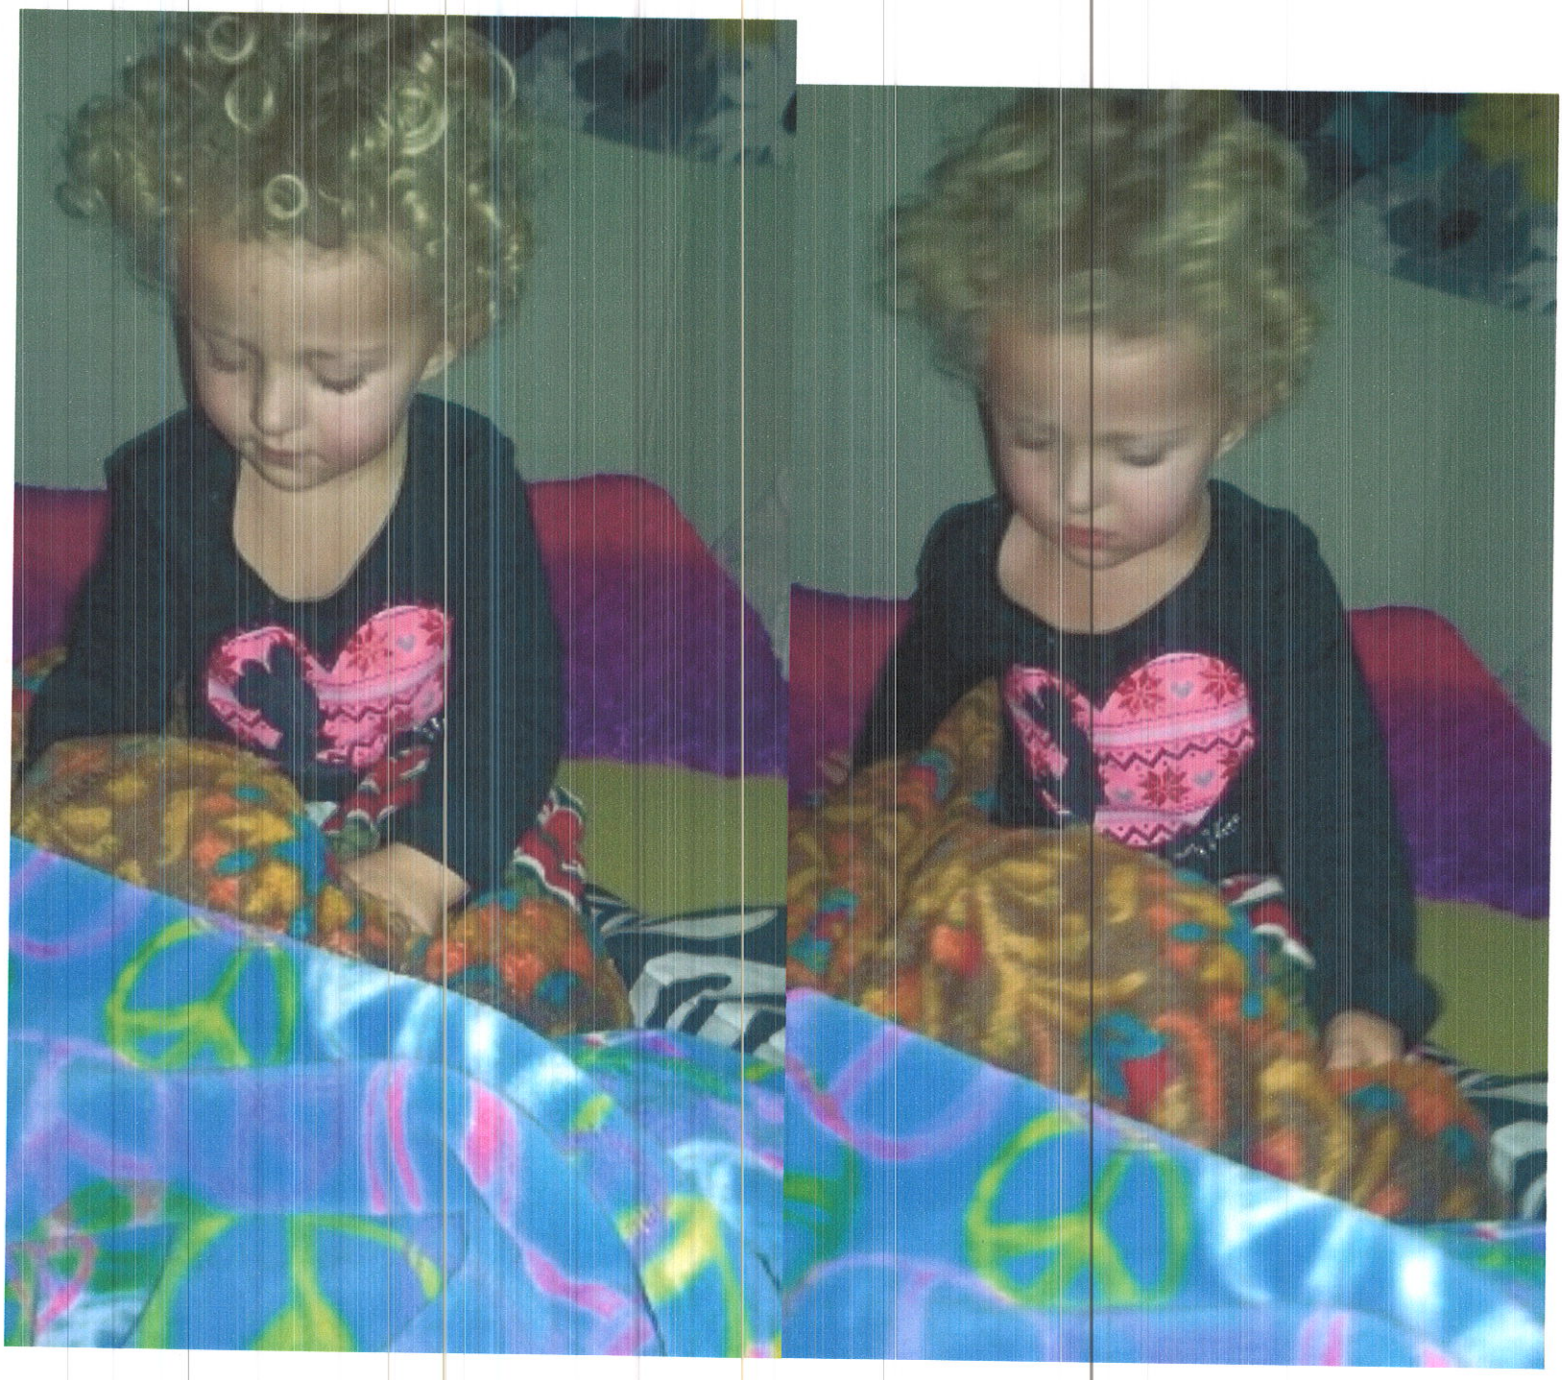
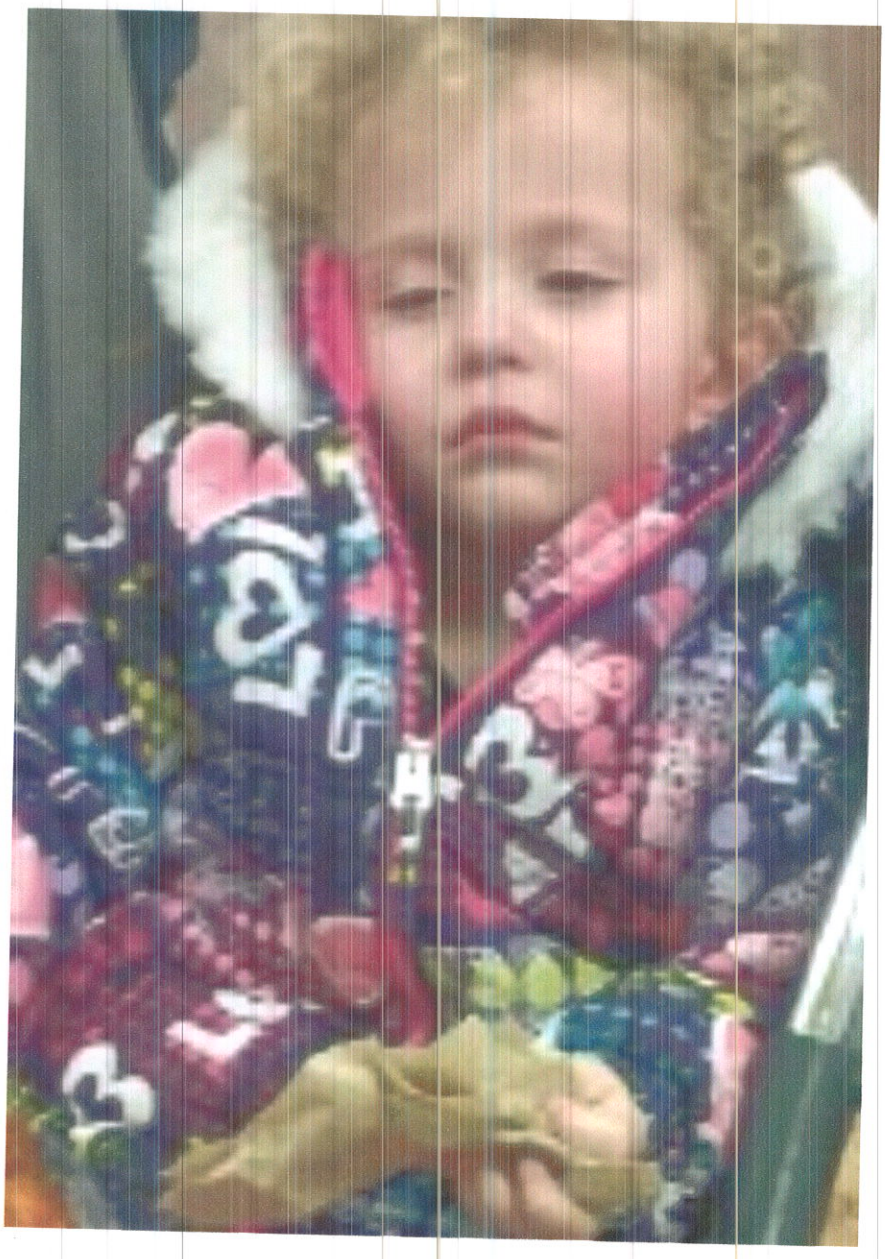
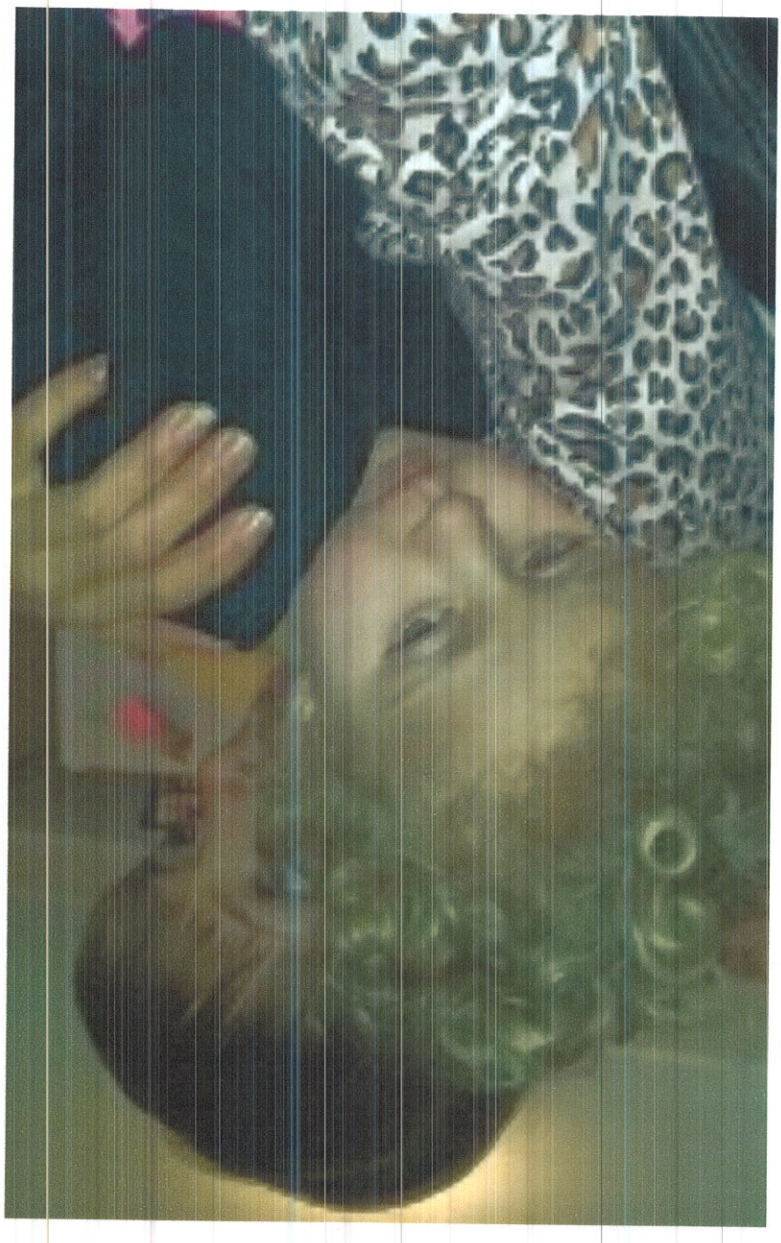
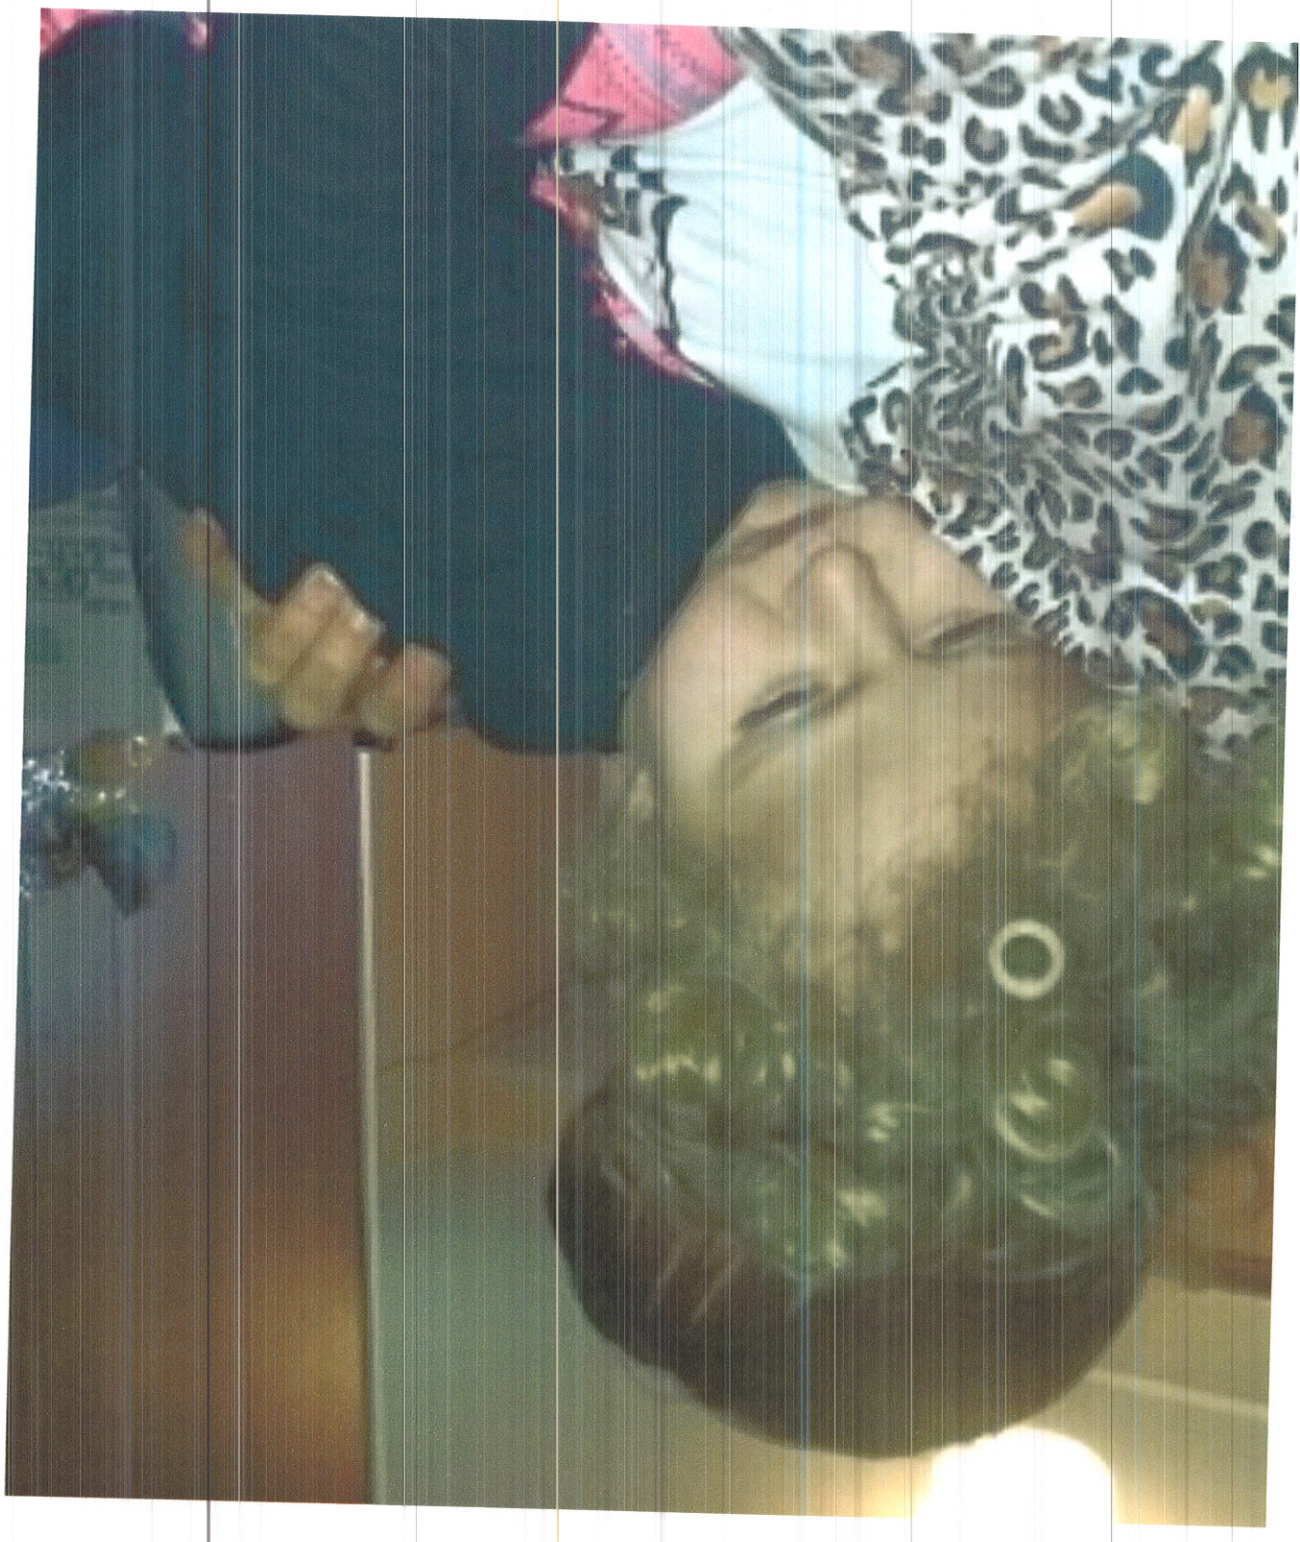
He let me supervise - runs off with Maddy to the bar - his plan the whole time - he does this in front of me - Imagine when unsupervised


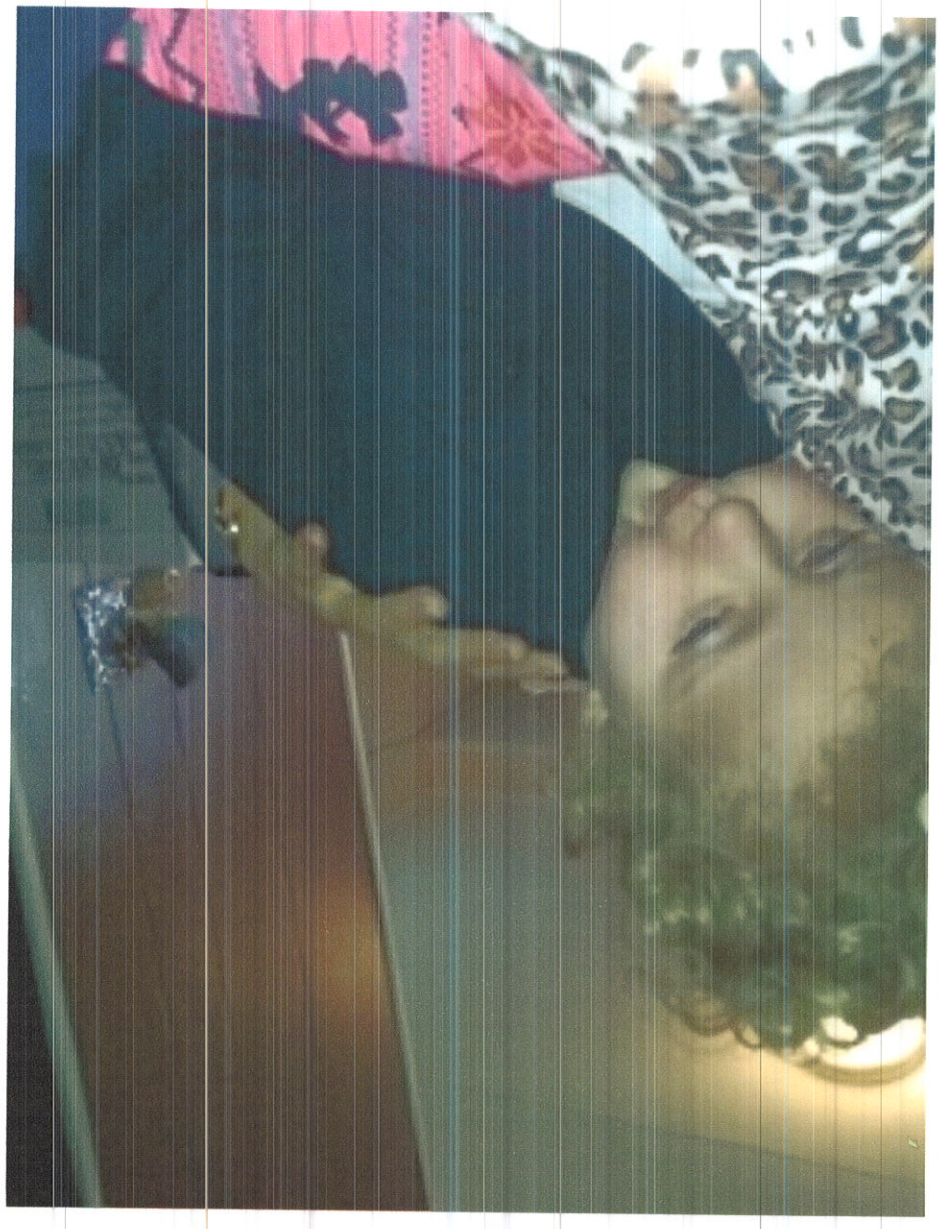


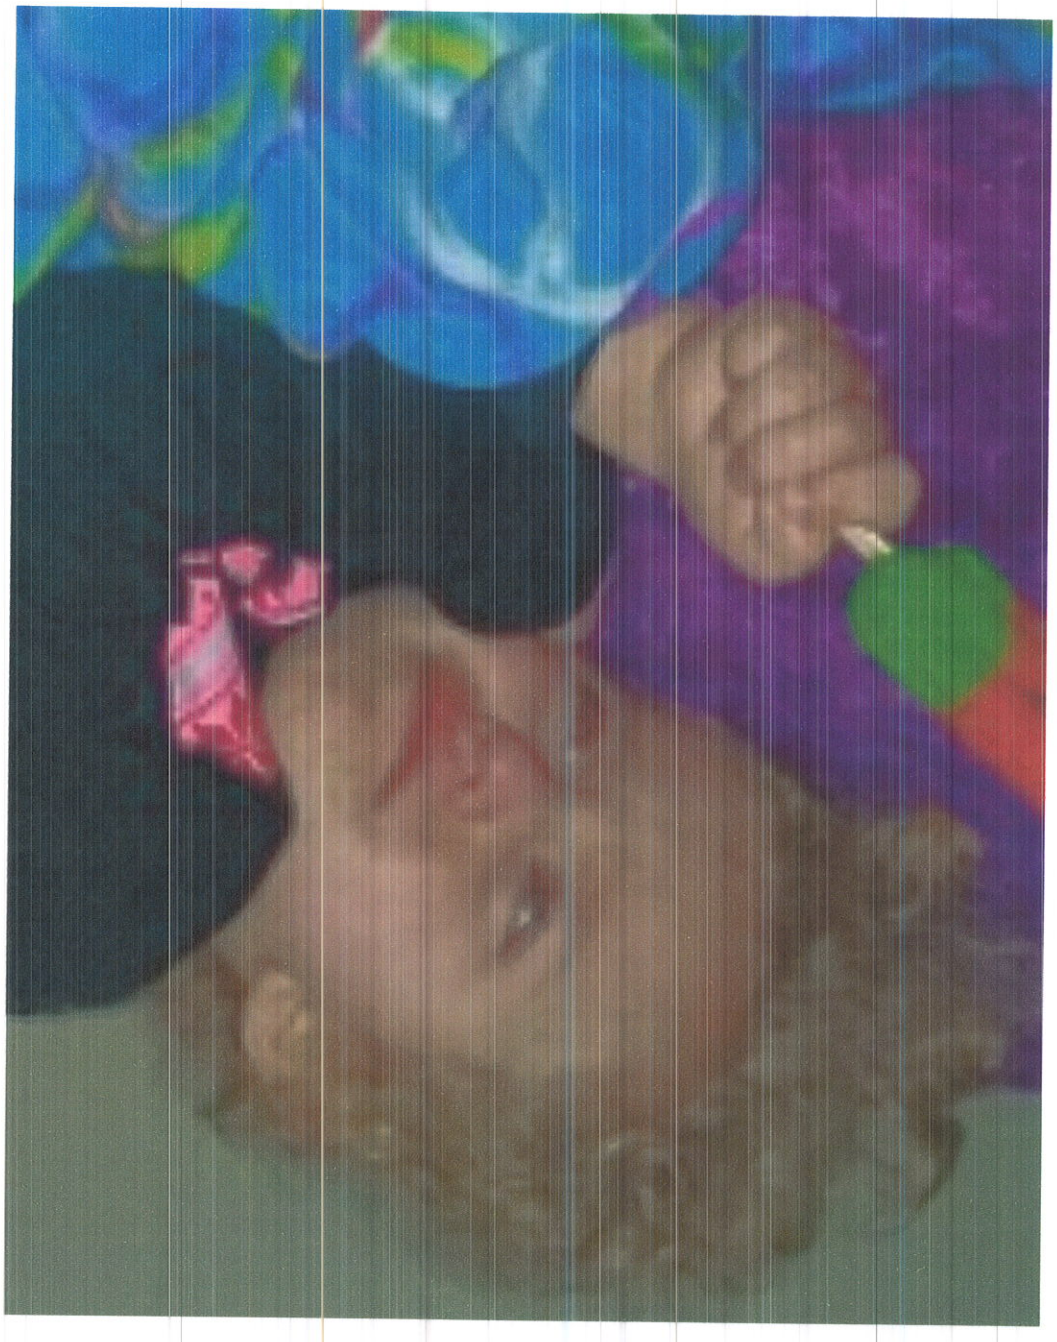


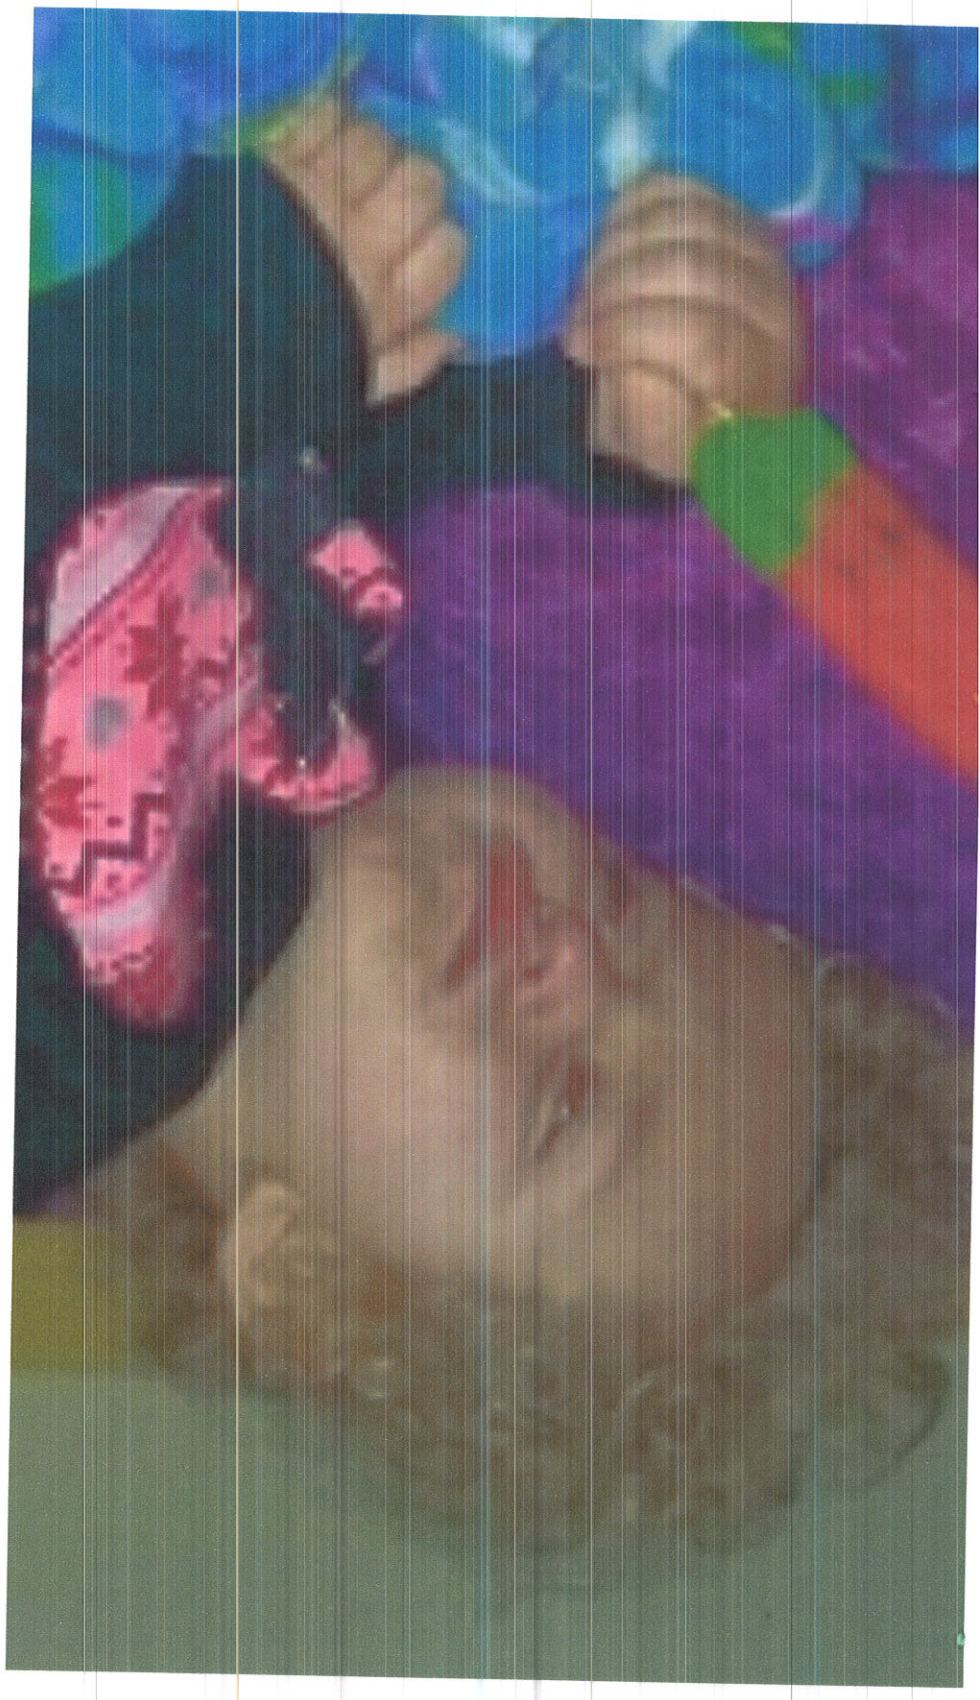












Madeline doesn't stand a chance with her Dad. His Idea of a good time is exposing maddy to a Drunken Bar, alchonal only, pills on the ground enviornment so he can see his friends play music - This was his visitation - He cares more about his social life at his daughter's expense. This is not safe for her But He thinks it is. He doesn't have high Expectations for his little girl + that is sad.
